Study of the area west of Scott street shows that the tracts were laid out from south to north with the "remainder" falling in the n-s dimensions of Tract "A". The error of closure found in traversing the lots west of Scott St & N. of Pima must then be placed in ~~the~~ Tract "A" to conform to this thinking. This is considered ~~a~~ to be the intended procedure in the field unless it is found that something else is already set up.
