1. **Offsite Hydrology**- Need to determine the quantity, the entrance and exit points, and how the flow is to be routed through the site.
2. **Onsite Hydrology**- Need to show how the flows are to be routed to retention basins. Need to determine quantity for pre and post development conditions.
3. **Onsite Retention**- Need to retain water for the 100-year, 2-hour storm for the site, including adjacent right of way. Determine volume needed and the size and location of basins
4. **Retention Disposal** – Provide preliminary design in accordance with Standard 6.10 for disposal of total ponding volume within 36 hours.
